

In

FORM

Foil	Granule	Shot
Ingot	Wire	
Powder	Pellet	

ALSO AVAILABLE

- Chemicals
- Low Melting Point Alloys
- Semiconductor Compounds

PURITY

3N - 7N

Indium

5N Plus is a significant supplier of indium and indium chemicals. One of the largest uses of indium is in the fabrication of indium tin oxide (ITO), which is essential to making the transparent electrodes in liquid crystal displays (LCD) and in touch screen technologies. Indium is also used in electronic, solar, optical and metallurgical applications. Among the latter, it's a constituent in many low melting-point alloys.

We supply indium in a broad range of forms, including a variety of compounds, chemicals and alloys, in purities from commercial grade to 7N (99.99999%).

Products

- Indium Metal
- Indium Antimonide
- Indium Nitrate
- Indium Oxide
- Indium Sulphate
- Indium Trichloride

Main Markets

- Electronics
- Energy
- Optics
- Petrochemicals

Typical Applications

- Light emitting diode (LED)
- Liquid crystal displays (LCD)
- Touch screens
- Thin-film solar panel
