

# Se

## FORM

Cored Wire	Granule
Pellet	Powder
Shot	Stick

## ALSO AVAILABLE

Chemicals

## PURITY

2N5 - 5N

Crude

## Selenium

5N Plus sells selenium to manufacturers of zinc selenide (ZnSe). This compound is transparent under infrared light and is used to manufacture lenses for carbon dioxide (CO<sub>2</sub>) lasers.

Selenium is also used in glass production, in metallurgy, and as an active ingredient in some novel thin-film solar cell technologies.

## Products

- Selenium
- Zinc Selenite

## Main Markets

- Animal feedstock
- Electronics
- Glass
- Optics

## Typical Applications

- Lenses for carbon dioxide (CO<sub>2</sub>) lasers
- Photovoltaic solar industry
- Thermoelectric devices
